

Trip to Lele

By Dinip Rijal, Grade 9

On Wednesday, grade 9 of Ullens School were taken to another school in Lele where we helped them learn in many ways and also gained knowledge from them. Being part of this new program was an amazing experience which was part of our CAS. We were taken there Mike Lily and Mahesh Tripathi.

We left school at 9:30 am and reached Lele around 11am. When we reached there we made several plans to do different activities with different groups, each group was assigned to a class. I and my group were assigned to grade 6. In grade 6 we started by interacting with them by asking their names, hobbies, and things that interested them. At first they were shy, therefore we gave our introduction which encouraged them to be more open and it helped us interact with them better.

After the introduction we wanted to do activities but our ideas were limited because of the rain which meant that we had to do indoor activity, but that didn't stop us from having fun. First of all we started the session by sharing some funny jokes, but it surprised me how many of them already knew the jokes. There was fun and then we started drawing things that they wanted to draw. After that we helped clean up their playground and they also helped which made it a lot cleaner and after that we ended our first session there and went to have lunch.

After lunch we were assigned to new grades where we were going to teach them how to do origami and we started by teaching them how to make box, swan and rabbit. After thorough step and step procedure we helped them all. We also learned about how their society is and about the nature which surrounds them.

Therefore I can say that the trip to Lele was a promising and truly memorable trip which I will remember throughout my life.
