

GRADE 3

Grade Teacher: Ms. Urmila Shrestha &
Ms. Bithika

नेपाली

नेपाली विषयमा कक्षा तीनका विद्यार्थीहरूलाई जीवनी विधाबाट महाकवि देवकोटा शीर्षकको पाठ अन्तरगतका क्रियाकलापहरू गराइयो । हाल उनीहरू कथा विधाबाट बाँदर र गोही शीर्षकको पाठ अन्तरगतका क्रियाकलापहरू गर्दैछन् ।

English:

We would like to thank those parents who have been working actively with their children in tandem with the teachers. The suggestions that you gave us during the parent-teacher-conference of the first term were valuable. We have already started implementing some of them.

Children have brought in a reading book from home for the 'class library'. This will be a collection of books in addition to the book the child can check out from the library each week. We will encourage children to read a variety of books during class hours in order to nurture the reading habit. Reading records for the child's progress will be maintained.

This past week we have been working on the story 'David is lost' from the Gul Mohar reader. The focus is on developing paragraph writing and a more detailed way of answering questions. We also have been revising previous lessons of using the articles 'a, an, the' in our sentences. We will continue to revise adjectives, nouns (plurals of nouns) in our classes.

Science:

In Science, children are learning 'Environment' unit with great interest. This unit is carried on together with current environmental issues like recent flood in Nepal. We found children eager to express their experiences on the topic 'pollution'. During group/class discussion, they came up with lots of outstanding views/ideas on causes, effects and control remedies for 'land pollution', 'water pollution', 'air pollution' and 'noise pollution'. This unit will be continued for a couple of weeks.

Mathematics:

In Mathematics, 'Geometry' unit is completed successfully with lots of project works. Children accomplished the projects with full enthusiasm. They found group/class discussion and project works really helpful in acquiring the concepts of geometry more clearly. Recently they have been working in the unit 'Area'. We found Activboard exclusively useful in teaching mathematics in the class. Children seem to enjoy the lessons taught in Activboard and concentrate more in their work. We will continue 'Area' unit for a couple of days followed by the unit 'Volume'.

Social Studies:

Keeping our traditional festivals in mind we have been discussing and collecting information on certain specific festivals that we celebrate in our homes. We would like to learn about our family traditions during festivals. This is the focus topic for the month, which we hope will help children understand diversity and celebration of diversity day that is coming up very soon in the school.

Computer

Grade 3 continued practice in WordPad but this time with the help of text tool, they typed text numbers and symbols in paint. Also they practiced changing font face, font color, font size .This practice was done thoroughly by typing letters, writing note on given topics, listing their favorite food and games. They also learned to put bullets on the points.

Changing font size, face and color will further help them in using other programs as well.

Visual Arts

In visual arts we continued working on previous projects during the month. Students enjoyed playing with different mediums and creating their ideas in their project works.

Primary students developed 2D drawings, Acrylic painting. Secondary level students also developed 2D drawings with 3D effect they did impression drawing, Imaginary drawing and practiced to develop pattern design. Recently, students are working on Mural painting, glass print and 3d sculptures. Eight and One graders got a chance to visit an art exhibition.
