

MONTHLY NEWSLETTER  
Grade: Kindergarten

Year: Two, No.2, 16<sup>th</sup> July 2007  
Grade Teachers: Subarna Maharjan  
and Shovana Shrestha

Kindergarten is really impressed by the improvement made by our children in learning activities. It would have never been possible without your kind cooperation.

In English as mentioned earlier, the kindergarten grade has been studying the alphabet. This month, children have learnt phonic sound of alphabet 'a' to 'z'. They have also completed worksheets with pictures of each sound. They were really excited to view their alphabet book in which they had put all their efforts.

In writing, first group children have already completed 'a', 'e' and 'i' sound words and second group children are working in 'a' sound words.

In Mathematics, first group children can read and write numerals from '0' to '100' and second group can read and write up to '50'. In order to strengthen the children's learning skill we are focusing on number activities so we involved them in activities such as largest and smallest number. Similarly, 'What comes after, before and in between?' were also taught. Next month we will work on addition, graph work and we will complete number name up to ten. This month we have introduced geometrical shapes- triangle and square. We also did some comparison activities such as tall & short, more & less and full & empty. The following month we will be giving the concept of heavy and light and geometrical shapes rectangle and semi-circle.

In vocabulary children are learning seasonal vegetables, fruits, flowers, primary & secondary colours, days of a week, months of a year, weather, food and summer clothes. The following month we will do activities on things found in kitchen, classroom and parts of the body. We have also started giving the student some ideas about rainy season.

नेपाली विषयमा विद्यार्थीहरूले साउँ अक्षरबाट बनेका शब्दहरू सिक्ने क्रममा स्तर अनुसार दुई , तीन र चार अक्षरबाट बनेका शब्दहरू पढ्ने र लेख्ने काम गर्दैछन् ।

Thank you
