## GRADE 5

Grade Teacher: Ms. Vani Rana & Ms. Mangali Magar

Dear Parents/ Guardians

Greetings from Grade V!

We would like to extend our best wishes for Dashain and Tihar. The students are really excited about the upcoming holidays. They have been working hard on all of their projects and learning activities.

This month Grade V went on a picnic. We had a good time in the picnic. Students went to Surya Binayak and had a lot of fun –dancing, singing and playing. They were also very responsible and cleaned up the place after the picnic. We are really proud of our environment conscious children!

The learning activities for this month were as follows:

### नेपाली

कक्षा पाँचका विद्यार्थीहरूले कविता विधा अन्तरगत **म कस्तो हुँ ,गरीब र नदी** शीर्षकका कविताहरूसँग सम्बन्धित सबै क्रियाकलापहरू गरी ती पाठहरूको एकाइ परीक्षा लिएर त्यसको प्रगति विवरण पनि पठाइएको छ । **बाह्य पढाइ** अन्तरगत उनीहरूले शिक्षकद्वारा निर्देशित एउटा कविता पढी त्यसको सामीक्षा गर्ने कार्य गर्दैछन् । कक्षा पाँचका सम्पूर्ण विद्यार्थी र अभिभावकहरूमा मेरो तर्फबाट विजया दशमीको हार्दिक मंगलमय शुभकामना !-देवकी पनेरु

### English:

In English, we completed the adventure story of Emil and the Detectives. Students completed a story plot comic strip. We did brainstorm activities of adventure stories. They also listened to fiction and non-fiction mystery stories – which they enjoyed thoroughly! The colorful project works have been put up for all to see. We have started the story of “Rosa Parks Sat Still”. Students are doing a small research project on the Civil Rights Movement of America and linking it up with their knowledge of human and fundamental rights. (Being done under the Social Studies unit).

### Mathematics:

In Mathematics, we have completed the group work on ‘Basic Mathematical Operation’. Children created their own questions/problems with solutions based on the four operations-Addition, Subtraction, Multiplication and Division. Now we are moving onto our next unit ‘Measurement’. Students are going to learn how to use the measuring tools and the units effectively in their daily life.

## Science:

In Science, we are working on the unit 'Environment and Pollution'. Children have brought knowledgeable information about global warming, green house effect, acid rain etc. It's been wonderful sharing the information with the children as it shows that the children are very much aware of the environment pollution around the world. They played games, had quizzes and other fun filled activities related with the unit using the active board.

**Class activity on Environment and Population**

## Computer

Grade 5 started with a new program, Microsoft office Word. Here they opened a new document and did simple typing .They did text formatting like changing font color, size and style. Besides this they also made some interesting designs by using Word art. They practiced making greeting card by using these tools.
